

# CARTRIDGE 37 mm AERIAL SONIC

# CARTRIDGE 37 mm AERIAL SONIC

REF. 3065/35

## DESCRIPTION

A cartridge designed for firing from 38 mm riot guns or signal pistols. When functioned the cartridge expels a canister containing the thunderflash composition and a delay element. After travelling the preset distance the delay element causes the composition to be ignited which results in a loud report accompanied by a bright flash of light.

## APPLICATION

This cartridge is suitable for use against rioters either by firing it above their heads, in front of them or through windows or open doors. Alternatively the cartridge is well suited for use on airport runways or in game conservation to scare birds or animals without injuring them. There are no fragments produced that may cause injury. The option of the 70 metre or 140 metre versions allows application over various ranges.

## SPECIFICATIONS

Length	:		100 mm
Diameter	:	38 mm stepped to 39,7 mm	
Range	:		70 or 140 m
Report intensity	:		110 dB minimum
Fragmentation	:		none
		<b>70 m</b>	<b>140 m</b>
Mass	:	117 g	120 g
Pyrotechnic Mass	:	13 g	15 g

## PACKAGING

<b>Item Packaging</b>			
Type of packaging	:	Waterproof	PVC Pouch
Quantity	:		5
<b>Bulk Packaging</b>			
Quantity per box	:		85
Type of box	:		Hardwalled Plastic
		<b>70 m</b>	<b>140 m</b>
Gross weight	:	16 kg	18 kg
Dimensions	Width :		402 mm
	Height :		236 mm
	Length :		512 mm

Additional information is available on request.
